

Engineered façades - Façade Panel (horizontal design)

FP H 7.1.01 Vertical window section - vented sil.

All dimensions are indicative unless specified on the drawing
Sheet thickness may be exaggerated for clarity

Scale 1/5

Notes:

- Window surround faces can be sized to match other elements of the façade, such as corner pieces or wall cappings.
- We advise that the window height and level is set such that it fits within the grid of the panels, taking into consideration the vertical faces of the surrounds and the fall of the sill.
- Generic structural details given for indicative purposes only.
- Window sections reproduced courtesy of Technal.
