

FL 4.1.04 Rear vented capping - rear 'T' plate.

All dimensions are indicative unless specified on the drawing
Sheet thickness may be exaggerated for clarity

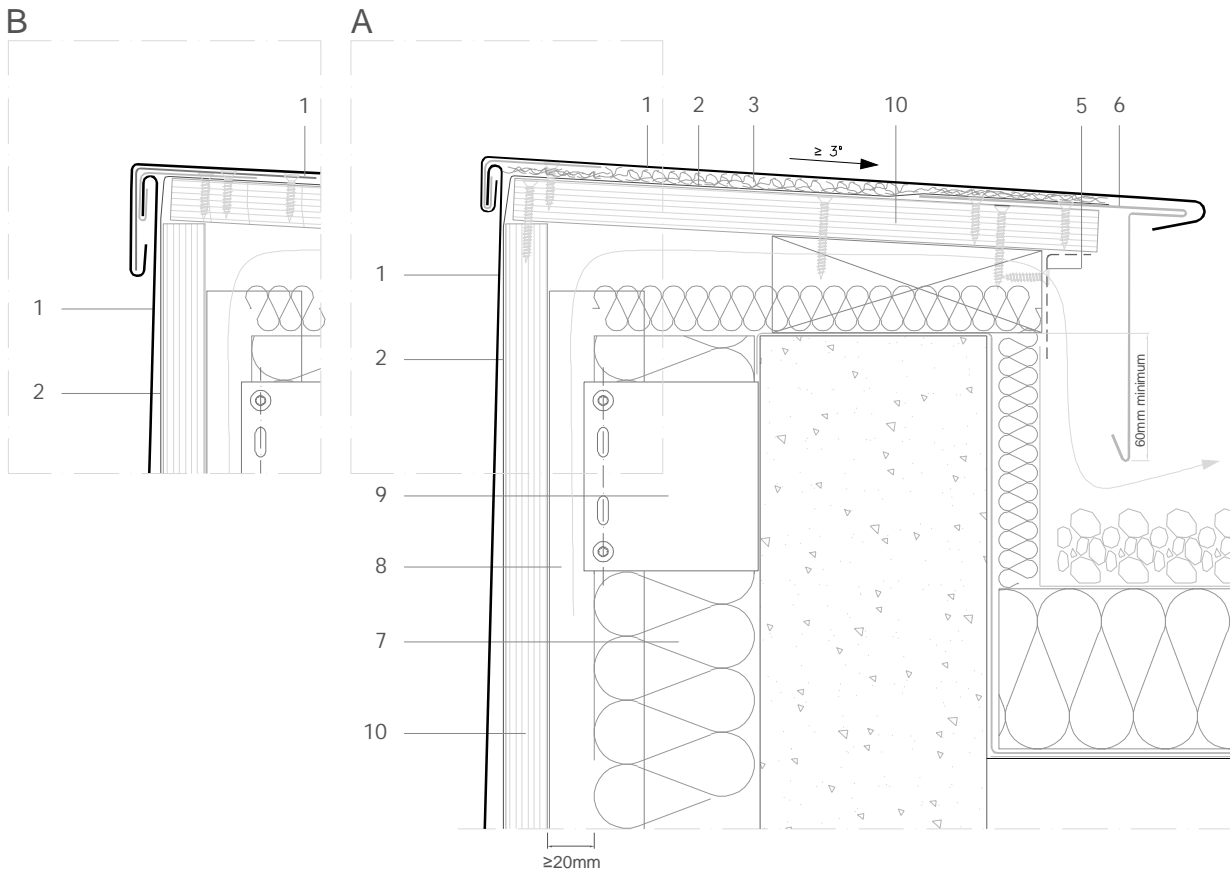

Scale 1/4

Notes:

- 'A' shows the wall coping attached to the top flat lock fold giving a very fine top seam to the façade.
- 'B' show the wall coping attached to a continuous galvanised fixing strip that permits the front face of the capping to be increased if desired, to tie in with other elements in the façade.
- Generic structural details are given for indicative purposes only.

1. elZinc® cladding
2. Membrane
3. Structural underlay
4. Folded galvanised steel profiles
5. elZinc® perforated sheet
6. elZinc® retention profile
7. Insulation
8. Wooden batten
9. Wall bracket
10. Substrate
