

DLSS 11.2.01a Soldered chimney, roofing upstands, lapped back gutter.

All dimensions are indicative unless specified on the drawing
Sheet thickness may be exaggerated for clarity

Scale 1/5

Notes:

- Joint 'A': Pitch > 25° - single lock cross welt (see DLSS 2.2.01)
25° ≥ pitch > 10° - Lap lock joint (see DLSS 2.2.02)
10° ≥ pitch - double lock standing seam turned down at tray edges and welted up into longitudinal standing seams, sealed.
- Laplock joint 'B': see DLSS 2.2.01.
- For chimneys wider than two bays it is recommended to incorporate a cricket in the back gutter to channel rainwater around the chimney.
- See DLSS 11.2.01b for the chimney cladding.
- See DLSS 11.2.02a for roofing sheet upstands with a soldered back gutter.
- Use elZinc® fluxes and strippers when preparing the material for soldering.
- The substrate is not shown in the general schematic for clarity.

1. elZinc® cladding
2. Membrane
3. Structural underlay
4. Folded galvanised steel profiles
5. elZinc® perforated sheet
6. elZinc® retention profile
7. Insulation
8. elZinc® hung gutter
9. Gutter clip
10. Gutter bracket
11. elZinc® clip
12. Substrate
