

LONG SLIDING CLIPS

Preassembled sliding clip for standing seam roofing and cladding

Material: Stainless steel AISI: 304 Material-Nº 1.4301

Main application :

- Double lock standing seam roofing – pre profiled trays
- Angle seam cladding – pre profiled trays

Installation:

- Fix to substrate using appropriate corrosion resistant fasteners
- Ensure fastener heads are flush with clip base to avoid damaging underside of elZinc®
- Clip centres according to elZinc® guidelines and local regulations

Main advantages:

- Rounded edges and beading protect the underside of the zinc trays.
- Design is according to the German Traditional Roofing Tradecraft Regulations
- High resistance to wind uplift.
- 70mm slot
- Clip fits tight over undercloak preventing it from sliding down before fixing

Stock clip types:

- 25 mm high for use with no underlay or a membrane underlay
0,6mm thick base - Countersunk holes
- 28 mm high for use with a matted structural underlay
0,6mm thick base - Normal or countersunk holes

Other heights, thicknesses and hole type combinations available upon request.

Nº pieces/box: 400
