

DATASHEET :

ZINC ANODES FOR ELECTROPLATING

Description of the product :

Electroplating spherical zinc anodes are manufactured according to the current standards UNE-EN 1179, ASTM-B6 and ISO 752 by Asturiana de Laminados S.A, by means of melting and casting Z1 99,995 % ingots.

Chemical composition:

% chemical composition (mass fraction)							
Nominal content of zinc	Pb max.	Cd max.	Fe max.	Sn max.	Cu max.	Al max.	Total impurities
≥ 99,995	0,003	0,003	0,002	0,001	0,001	0,001	≤0,005

Packaging:

- Diameter of each sphere: 50mm
- Anode weight: 470g
- Cardboard box : 25kg
- Anodes in each box: 50
- Boxes in each wooden pallet: 40
- Net weight of the pallet: 1000kg
